Why detoxify?

TODAY WE ARE EXPOSED more than ever before to toxic overload, both in our environment, in the air we breathe, in the food we eat and the water we drink. Chemical and heavy metal residue build up in our bodies at a faster rate than ever before. We see an increase in allergies along with the increase of depression and physically debilitating conditions. To help eliminate these conditions Lumatox is great for assisting with internal cleansing.

How does Lumatox® work?

IT IS A DETOX WATER FOOT BATH which uses brass and stainless steel electrodes. It is used as a foot bath to cleanse, balance and enhance the bio-energy (the vital energy force present in the breath of bodily fluids). This energy is the electromagnetic force that is stored within the body and utilized by our cells. Chinese medicine refers to this energy as the "chi". The complex energy fields permeate and realign the body's energy field while improving oxygen levels. While the foot bath is widely used to increase energy (both physical and mental energy), vitality and stamina, at the same time, it may assist in removing the body from toxins, chemicals, radiation, pollution, synthetics and other foreign material trapped in the skin layers that have clogged up the body's systems of elimination. It's internal cleansing may include parasite cleansing which may result in less body fluid retention, reduced inflammation, greater bladder control, a more balanced pH with many clients reporting pain relief, including headaches, gout and arthritis pain.

Benefits of Ionic Cell Therapy?

THE HUMAN BODY contains electric currents. Disorders of the body have vibrational frequencies that are incompatible with healthy cells; thus, they disrupt the cells natural oscillation and polarity. This disruption creates imbalance and chaos within each affected cell. When cells are in an imbalanced state, they are unable to facilitate the body's functions needed. But when cells are fully charged, they have more oxygen and are able to experience electrical balance, which results in a feeling of a healthy attitude, vitality and well-being. This balance increases our sense of awareness and our sense of mind/body/spirit connection. Studies have shown the machine significantly improves oxygen levels.

It has been reported that an overall balancing effect occurs, along with significant increase in the number of negative ions. Ions are atoms or molecules that have lost or gained electrons (free radicals are unpaired electrons). If the

atoms or molecules lose electrons, they become positively charged ions.
